Bloom

VETERINARIAN RECOMMENDED

FEATURES

- Helps animals achieve a soft, silky, shiny and healthy coat
- Enhanced Protein Quality
- Essential Amino Acids
- Supports pigmentation and highlights in coat color
- Ground Flax
- Biotin

dac® BLOOM provides a fat, protein and mineral profile for all classes of horses. The ingredients in **dac® BLOOM** help improve overall hoof, skin and coat quality as well as providing additional calories to assist in weight gain or maintenance during exercise.

INGREDIENTS

Soybean Meal, Whey Protein Concentrate, Partially Hydrogenated Vegetable Fat, Ground Flax, Zinc Methionine Complex, Biotin, DL Methionine and Natural Flavor.

AVAILABLE SIZES:

- 5# Bag
- 20# Bag
- 40# Bag

QUALITY SEAL NASC NATIONAL ANIMAL SUPPLEMENT COUNCIL

CONTAINS ZINPRO PERFORMANCE MINERALS®

GUARANTEED ANALYSIS

(Per 1 oz.)

Crude Protein (min)	30% (8,500 mg)
Crude Fat (min)	32% (9,070 mg)
Crude Fiber (max)	6.0% (1,700 mg)
Zinc (min)	1,300 ppm (36 mg)
Lysine (min)	2% (566 mg)
Methionine (min)	0.85% (240 mg)
Threonine (min)	1.2% (340 mg)
Phenylalanine (min)	1.50% (425 mg)
Isoleucine (min)	1.40% (396 mg)
Tryptophan (min)	0.4% (113 mg)
Glycine (min)	1.0% (283 mg)
Valine (min)	1.40% (396 mg)
Leucine (min)	2.40% (680 mg)
Histidine (min)	0.85% (240 mg)
Biotin (min)	20 mg/lb (1.25 mg)

FEEDING DIRECTIONS

dac® BLOOM can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **dac® BLOOM**. Feed **dac® BLOOM** at the following rates:

Horses:

Maintenance	1 oz. (1 scoop) per horse per day.
Preparation for Show or Sale	2 oz. (2 scoops) per horse per day.
Performance	3 oz. (3 scoops) per horse per day.

Feeding rate based on 1000 lb. horse.
Do not feed to sheep.

SPECIAL INGREDIENTS

Bio-available Trace Minerals – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac® BLOOM** utilizes organic minerals to increase availability and enhance absorption rates.

Zinc - Zinc is associated with the health and integrity of hair, skin, hooves and the immune system. Zinc deficiencies impede the synthesis of DNA, RNA and protein, which are necessary for proper coat condition and repair. Included in **dac® BLOOM** is a zinc Methionine complex provided by Zinpro Performance Minerals.

Methionine - Methionine is an essential amino acid which is required to be supplemented in the horse's diet, as horses are not able to produce it themselves. Methionine stimulates the production of keratin fibers in the horse's coat. Methionine works synergistically with biotin to increase the effectiveness of both nutrients.

Lysine - is a pivotal amino acid in equine diets. Without adequate lysine, overall protein requirements are higher. Feeding additional lysine increases protein quality of the diet and may improve muscle mass.

Biotin - Biotin is a water soluble B-Group Vitamin. Research suggests that biotin stimulates the production of keratin, which in turn provides for the production of smooth, soft hair in the coat.

Ground Flaxseed - is high in omega-3 essential fatty acids which enhances overall health in horses. Essential fatty acids cannot be synthesized by the horses and therefore must be provided in their diet.
