"IT MAKES A WORLD OF DIFFERENCE"

BRIGHT+

ACCENT SHAMPOO

For brighter whites, shiny highlights and silvery greys

Execute a show ring finish and accent cleaning with dac® BRIGHT+ ACCENT SHAMPOO. Its full body spa brightening action enhances brighter whites, shiny highlights and silvery, sparkling grays. Stubborn yellow, green and brown stains are uplifted by powerful stain fighting blend & lighteners. Brilliance bought in a bottle.

DIRECTIONS:
Wet animal thoroughly. Apply Bright+ with a sponge and use a curry comb or fingers to work the shampoo in and dirt out.
For stubborn stains, leave on for 5-10 minutes. Rinse thoroughly with fresh water. Remove excess water with a squeegee scraper, or towel.

BRIGHT+ ACCENT SHAMPOO

For brighter whites, shiny highlights and silvery greys

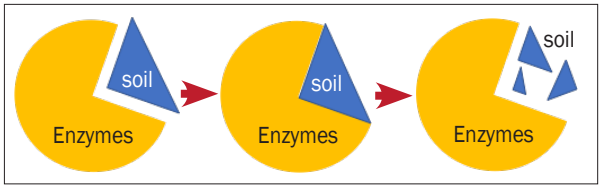

dac® Bright+ Accent Shampoo

Brightens the coat, mane, and tail through four pathways

Enzymatic Action: Both formulas contain a blend of enzymes targeting protein, starch, and pectin based stains.

Subtilisin Protease – Breaks down grass, manure, and urine based stains.
Grass contains 16-28% protein

Alpha-Amylase – Targets starches and carbohydrates. Cellulose and complex sugars are the largest component by mass of grass

Pectate lyase – Digests pectin. Large component of manure and soil or mud especially

---

Naturally Based Surfactant Blend: Once the soil is broken down by the enzyme blend, the surfactant helps emulsify or suspend the soil molecules in solution.
- Biodegradable, coconut based surfactants
- Mild on skin and coat while being efficient at soil removal

---

Optical Brightener: The Accent Shampoo contains a powerful optical brightener.

-Fluorescent dye that absorbs invisible UV light and converts the energy into visible blue light which makes whites brighter and colors more vibrant.

Nutrition: Optimizing the nutrition content of the mane, tail, and coat brings out the natural vibrancy and brightness.

-Glycerin – maintains moisture balance
Humectant

-Aloe Vera Extract – prevents sun fading and enhances hair nutrients
Lignin absorbs UV light and acts as a broad spectrum sunblock
Beta Carotene acts as an antioxidant and encourages hair growth
Vitamin C is a shine enhancer and color retainer.
