CLEANSING
HOOF THERAPY
Protective Conditioner

Builds hoof wall and cushion

Deodorizes Thrush odors while maintaining the hoof moisture balance

- Improves dry, cracked, and chipped hooves
- Helps increase hoof strength and pliability to prevent cracks
- Helps restore and support flexible, healthy hooves
- Creates breathable moisture barrier
- Antibacterial and Anti-fungal
- Leaves hooves with a healthy shine

Packed 12 per case
DAC10042

DIRECTIONS: INSTRUCTIONS: Thoroughly clean the hoof and debride the area of infected tissue before appling HOOF THERAPY.

Apply HOOF THERAPY into clefts of frog, heel bulb, and any holes or cracks. In severe cases, the hoof can be packed with gauze or cotton after application of product.

For active cases apply 1-2 times daily for a minimum of 3 days. As a preventative measure, apply twice weekly.

What makes HOOF Therapy it work so well

Zinc Pyrithione: Disrupt membrane transport by blocking the proton pump that energizes the transport mechanism, starving the cell.

Tea Tree Oil: Acts as an antifungal/antimicrobial agent, effective even against antibiotic resistant microbial strains.

White Thyme Oil: Stimulates blood flow which promotes the delivery of nutrients throughout the hoof. Contains thymol which is potent at combating bacterial and fungal infections while soothing pain and inflammation

CLEANSING HOOF THERAPY
Protective Conditioner

HOOF THERAPY

Maintains healthy hooves by providing protection against a wide spectrum of microbial infections, balancing the moisture content of the hoof, and supplying nutrients needed for strong hoof growth.

Hoof Therapy is loaded with nutrients that facilitate healthy, strong, hoof growth.

- **Tea tree oil** and **thyme oil** disrupt the permeability of the bacterial membrane, causing the cell to burst. Tea tree oil and thyme oil stimulate blood flow which assists in the distribution of nutrients throughout the hoof and expedites hoof growth.
- **Zinc pyrithione** is a broad spectrum anti-microbial that disables the cell transport system in fungal and bacterial cells.
- **Silver Nitrate** affects several aspects of microbial life including DNA replication, microbial energy production, and oxygen use.

Hoof therapy 4 key ingredients that address microbial infections such as thrush, foot rot, and canker at the source.

Minimum Inhibitory Concentration (%)

	Fusobacterium necrophorum	
Tea Tree Oil	0.06	3x
Thyme Oil	0.1	2x
Zinc Pyrithione	0.13	15x
Silver Nitrate	0.01	4x

Moisturizing

- **Glycerin** and **Abyssinian Oil** work to balance the moisture content of the hoof.
  - -Glycerin stops the evaporation of moisture from the hoof through its humectant properties.
  - -Abyssinian oil quickly absorbs into the coronary band and periople to provide moisture throughout the hoof.

Nutrition

- **Hydrolyzed keratin** absorbed through the coronary band is directly incorporated in the synthesis of the tubules of the outer hoof wall.
