Racing Formula

VETERINARIAN RECOMMENDED

FEATURES

- Bio-available Trace Minerals
- Organic Selenium
- Supplies essential minerals and nutrients
- Bio-available Iron
- FDA approved chromium
- Exclusive PHN/dac GIPro3
- 100% Natural Vitamin E
- Biotin

dac® RACING FORMULA provides a balanced vitamin and mineral profile for high performance horses & elite equine athletes. Vitamins & minerals play a critical role in numerous metabolic functions including: nerve function, immune function, hoof, and coat quality as well as energy balance. **dac® RACING FORMULA** is enhanced with Probiotics.

INGREDIENTS

Soybean meal, alfalfa meal, soybean oil, dry whey product calcium carbonate, monosodium phosphate, potassium chloride, choline chloride, iron amino acid complex, selenium yeast, d-alpha tocopherol acetate (source of natural vitamin E), vitamin A supplement, vitamin D3 supplement, menadione sodium bisulfate complex (source of vitamin K activity), zinc sulfate, magnesium oxide, ferrous sulfate, manganese sulfate, cobalt sulfate, chromium propionate, biotin, vitamin B-12 supplement, folic acid, niacin supplement, calcium pantothenate, riboflavin supplement, ascorbic acid, thiamine hydrochloride, pyridoxine hydrochloride, ethylenediamine dihydroiodid, calcium carbonate, dried bacillus subtilis fermentation product, mineral oil, dried bacillus licheniformis fermentation product and maltodextrin.

AVAILABLE SIZES:

- 5# Bag
- 20# Bag
- 40# Bag

GUARANTEED ANALYSIS

(Per 1 oz.)

Crude Protein (min)	14% (3972 mg)
Crude Fat (min)	6% (1700 mg)
Crude Fiber (max)	15% (4250 mg)
Calcium (min)	11% (3121 mg)
Calcium (max)	13% (3688 mg)
Phosphorus (min)	4% (1135 mg)
Iron (min)	4700 ppm (133.5 mg)
Zinc (min)	3750 ppm (106.5 mg)
Manganese (min)	2100 ppm (59.6 mg)
Copper (min)	700 ppm (19.8 mg)
Selenium (min)	40 ppm (1.1 mg)
Chromium (min)	.70 ppm (2 mg)
Vitamin E (min)	3,000 IU/LB (187 IU)
Vitamin K (min)	35 mg/lb. (2.1mg)
Biotin (min)	59mg/lb (3.5mg)

FEEDING DIRECTIONS

dac® RACING FORMULA can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **dac® RACING FORMULA**. Feed **dac® RACING FORMULA** at the following rates:

Horses In Training	2 oz. (2 scoops) per horse per day if fed with unfortified grains

Consult an equine nutritionist or **dac®** if feeding with fortified grain.
Feeding rate based on 1000 lb. horse.
Do not feed to sheep.

SPECIAL INGREDIENTS

Organic Selenium – Selenium is an essential nutrient that plays a critical role in metabolism, healthy growth, reproductive health, and immunity. It also acts as a powerful antioxidant to prevent fatty acid oxidation which can cause tissue damage. Research has shown organic selenium is more readily absorbed and retained than selenium in inorganic forms.

Vitamin E – is a potent antioxidant during strenuous exercise. Horses with an inadequate reserve of antioxidants might experience muscle soreness or stiffness during an exercise bout and prolonged recovery following hard work.

Bio-available Trace Minerals – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac® RACING FORMULA** utilizes organic minerals to increase availability and enhance absorption rates.

Iron – plays a critical role in oxygen transport and cellular respiration. Iron makes up the center of hemoglobin, which is the oxygen transport molecule in blood. It is also present in myoglobin, which helps get oxygen into your horse's muscles.

Chromium – Helps support energy production at a cellular level by supporting glucose uptake by the cell. This enhances exercise tolerance, supports normal recovery time after strenuous activity and helps support stamina and endurance.
