FOR USE IN HORSES ONLY

SPECIAL INGREDIENTS

B-Vitamins – are water soluble vitamins including Thiamine (B1) and Pyridoxine (B6). Thiamine is required on a daily basis and is vital for normal muscle and nerve function. Thiamine also helps to maintain appetite. Pyridoxine is critical for amino acid metabolism, red blood cell formation and nerve function. Both Thiamine and Pyridoxine are known to have a calming effect on the nervous function.

Magnesium – is a trace mineral that is an important ion in the blood and it plays an important role as an activator of many enzymes, and participates in muscle contractions. Signs of magnesium deficiency include nervousness, muscle tremors, and ataxia.

Tryptophan - is the amino acid precursor for serotonin, a neurotransmitter implicated in sedation, inhibition of aggression, fear and stress.

FEATURES

- Fortified with B-Vitamins
- Magnesium
- Tryptophan
- Highly palatable

dac[®] FORMULA CALM B provides a balance of ingredients intended to support calm, balanced behavior in mature horses.

INACTIVE INGREDIENTS
