

# Total Performance

VETERINARIAN  
RECOMMENDED

## FEATURES

- Bio-available Trace Minerals
- Organic Selenium
- Essential Amino Acids
- Bio-available Iron
- Enhanced with Probiotics
- Beneficial Bacteria
- 100% Natural Vitamin E
- Biotin

**dac® TOTAL PERFORMANCE** provides a balanced vitamin and mineral profile for high performance horses & elite equine athletes. Vitamins & minerals play a critical role in numerous metabolic functions including: nerve function, immune function, hoof, and coat quality as well as energy balance. **dac® TOTAL PERFORMANCE** is enhanced with Probiotics.

## INGREDIENTS

Soybean meal, alfalfa meal, soybean oil, dry whey product calcium carbonate, monosodium phosphate, potassium chloride, choline chloride, zinc proteinate, manganese proteinate, copper proteinate, cobalt proteinate, iron proteinate, selenium yeast, d-alpha tocopherol acetate (source of natural vitamin E), vitamin A supplement, vitamin D3 supplement, menadione sodium bisulfate complex (source of vitamin K activity), zinc sulfate, magnesium oxide, ferrous sulfate, manganese sulfate, cobalt sulfate, biotin, vitamin B-12 supplement, folic acid, niacin supplement, calcium pantothenate, riboflavin supplement, ascorbic acid, thiamine hydrochloride, pyridoxine hydrochloride, ethylenediamine dihydroiodid, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dextrose, and sodium aluminosilicate.

### AVAILABLE SIZES:

- 5# Bucket
- 20# Bucket
- 40# Bag

FORMULATED WITH  
**Altech®**  
SOLUTIONS

## GUARANTEED ANALYSIS

(Per Scoop – 1 ounce)

Crude Protein (min) . . . . .	14% (3972 mg)
Crude Fat (min) . . . . .	6% (1700 mg)
Crude Fiber (max) . . . . .	15% (4250 mg)
Calcium (min) . . . . .	11% (3121 mg)
Calcium (max) . . . . .	13% (3688 mg)
Phosphorus (min) . . . . .	4% (1135 mg)
Iron (min) . . . . .	4700 ppm (133.5 mg)
Zinc (min) . . . . .	3750 ppm (106.5 mg)
Manganese (min) . . . . .	2100 ppm (59.6 mg)
Copper (min) . . . . .	700 ppm (19.8 mg)
Selenium (min) . . . . .	40 ppm (1.1 mg)
Vitamin E (min) . . . . .	3,000 IU/LB (187 IU)

## FEEDING DIRECTIONS

**dac® TOTAL PERFORMANCE** can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **dac® TOTAL PERFORMANCE**. Feed **dac® TOTAL PERFORMANCE** at the following rates:

Horses In Training:	2 scoops (2 ounces) per horse per day if fed with unfortified grains.
---------------------	---

Consult an equine nutritionist or **dac®** if feeding with fortified grain. Feeding rate based on 1000 lb. horse.

## SPECIAL INGREDIENTS

### SEL-PLEX®

**Organic Selenium** - Selenium is an essential nutrient that plays a critical role in metabolism, healthy growth, reproductive health, and immunity. It also acts as a powerful antioxidant to prevent fatty acid oxidation which can cause tissue damage. Research has shown that **Sel-Plex®**, an organic form of selenium, is more readily absorbed and retained than selenium in inorganic forms. **Sel-Plex®** is the ONLY organic selenium to be reviewed by the FDA (Food and Drug Administration).

**Vitamin E** – is a potent antioxidant during strenuous exercise. Horses with an inadequate reserve of antioxidants might experience muscle soreness or stiffness during an exercise bout and prolonged recovery following hard work.

### BIOPLEX®

**Bio-available Trace Minerals** – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac® TOTAL PERFORMANCE** utilizes organic minerals to increase availability and enhance absorption rates.

**Iron** – plays a critical role in oxygen transport and cellular respiration. Iron makes up the center of hemoglobin, which is the oxygen transport molecule in blood. It is also present in myoglobin, which helps get oxygen into your horse's muscles.

**Biotin** - Biotin is a water soluble B- Vitamin. A number of research trials have concluded that providing 20mg of biotin per day will result in significant improvements to hoof quality in a period between 6 and 12 months.

**Probiotics** – are live microorganisms (including beneficial strains of bacteria) thought to be beneficial to the horse. These natural additives help maintain the correct balance of microflora in the small intestine and cecum to help bypass nutrients to be completely digested in the gut.
