PET URINE ODOR & STAIN ELIMINATOR

Don't settle for ordinary products that merely mask the odor with a chemical smell. Our advanced biological formula follows the path of the urine to break down and remove the source of the odor, while attacking the toughest stains. Our formula also helps prevent pets from returning to the same location.

TO CLEAN UP MESSES:

Test in an inconspicuous area before using.

STEP 1: Blot excess urine with towel and pick up any solids. For best results, use a wet extraction device to remove urine messes.

STEP 2: Pour a liberal amount of room-temperature water on the soiled area. Use an extraction machine (suction device) or absorbent towel to remove as much as possible. Repeat the diluting and extraction process of the soiled area 2-3 times

STEP 3: Spray or pour a liberal amount of PET URINE ODOR & STAIN ELIMINATOR on the soiled area. Let penetrate deep into the carpet. Blot with towel and let the biologicals finish the rest!

*For optimal results, cover cleaned area with a white towel and place a weighted object on top for 24 hours. Any deep stains in carpet fibers WILL WICK INTO THE TOWEL.

INGREDIENTS: Water (CAS# 7732-18-5), Bacteria Culture (CAS# N/A), C9-C11 Ethoxylated Alcohol (CAS# 68439-46-3), Fragrance (CAS# N/A)

Consult website for California SB 258 and New York HCPIDP ingredient disclosure

CAUTION: KEEP OUT OF REACH OF CHILDREN. Not for internal consumption. Avoid prolonged contact with skin. May cause temporary irritation. If ingested, drink milk or water and consult a physician. Avoid contact with eyes. If product comes into contact with eyes, flush immediately with water and consult a physician. If allergic reaction occurs, discontinue use.
