# DHA Perform

## ACTIVE INGREDIENTS

(Per 1 oz.)

DHA (Algae) ..... 4800 mg

## DIRECTIONS FOR USE

Administer **dac**<sup>®</sup> DHA PERFORM at the following rates:

Horses:

Maintenance	2 oz. per horse/day
Performance	4-6 oz. per horse/day
Breeding	4-6 oz. per horse/day

**dac**<sup>®</sup> DHA PERFORM should be introduced gradually to avoid refusal. **dac**<sup>®</sup> DHA PERFORM should be introduced gradually a minimum of 60 days prior to the first intended date of breeding. Administer based on 1000 lb. horse. Administration should be adjusted according to body weight.

**CAUTIONS:** If animal's condition worsens or does not improve, stop product administration and consult your veterinarian. Safe use in pregnant animals or animals intended for breeding has not been proven. An examination from a veterinarian is recommended prior to using this product.

**WARNINGS:** Not for human consumption. Keep out of the reach of children and animals. In case of accidental overdose, contact a health professional immediately. This product should not be given to animals intended for human consumption.

**FOR USE IN HORSES ONLY**

## SPECIAL INGREDIENTS

Docosahexaenoic acid (DHA, an Omega-3 fatty acid) is a major poly unsaturated fatty acid it may play a role in numerous roles in the body:

### Inflammation

- Omega-3 fatty acids help decrease normal inflammatory pathways
- May help reduce inflammation associated with training and competition

### Cardiovascular Health

- Helps support normal cardiovascular function
- Supports normal cardiovascular, immune and neurological function

### Pulmonary Health

- Helps support normal respiratory function and health
- Supports normal integrity and function of lungs

### Neurological function

- Promotes healthy vision development
- Supports normal brain and nerve function

### Immune Function

- Support for animals with sensitive skin
- Support for seasonal skin allergies
- Supports the immune system

### Performance

- Enhances exercise tolerance
- Supports normal muscle recovery
- Helps support stamina and endurance
- Promotes proper glucose metabolism
- Supports normal recovery time after strenuous activity

- F E A T U R E S**
- Omega-3 fatty acids help decrease normal inflammatory pathways
  - Helps support normal detoxification processes
  - Soothes skin-related issues associated with seasonal allergies
  - May help reduce inflammation associated with competition and training
  - Helps support normal respiratory function and health
  - Supports normal integrity and function of lungs

**dac**<sup>®</sup> DHA PERFORM is a docosahexaenoic Acid (DHA) supplement that may help reduce inflammation associated with training and competition in all classes of horses. Omega 3 fatty acids include  $\alpha$ -linolenic acid (ALA, plant sources such as flax), eicosapentaenoic acid (EPA, marine sources such as algae), and docosahexaenoic acid (DHA, marine sources such as algae). There is NO EPA/DHA in any plants like flax, chia, hemp etc. The body does not utilize ALA directly, it must first be converted to EPA and DHA this conversion rate is poor. In order to be reaping the benefits of Omega 3 fatty acids we need to administer direct sources of DHA.

## INACTIVE INGREDIENTS

Citric acid (a preservative), diglycerides, mono-glycerides, rosemary extract, Soy Lecithin.

### AVAILABLE SIZES:

- 16.5# Bag
- 33# Bag
