

# ICE

## Cooling LINIMENT

**Helps soothe soreness and discomfort in horses due to exercise, overexertion, or stress**

dac<sup>®</sup>ICE is a topically applied product used to help soothe sore muscles from competition, stress or overexertion. dac<sup>®</sup>ICE is applied directly to the skin before or after exercise or anytime needed. It is rapidly absorbed and can be used alone or mixed with other topically applied products. Apply ICE to the pasterns, cannon bones, knees, hocks, stifles, or other external problem areas.

dac<sup>®</sup>ICE can be used on any horse. ICE will not leave a sticky residue. Designed for horses.

Essential Oils  
Aroma therapeutic
